

tasklist.org - A comprehensive list of processes running in your computer

Filename: Explorer.exe

Name: Microsoft Automatic Updater

Description: Added by the <a

www.sophos.com/virusinfo/analyses/w32rbots.html>RBOT-SG WORM! Note -

the legitimate Windows Explorer (explorer.exe) is located in the Windows or Winnt folder and would not normally appear in Msconfig/Startup unless you added it manually! This one is located in the System32 subfolder

Recommendation: Definitely not required - typically viruses, spyware, adware and "resource hogs"

We found that [Easy SpyRemover](#) is the most effective tool for removing this file.
